# ***ISOMETRIC™***

SIGNATURE YONEX TECHNOLOGY SINCE 1980

ISOMETRIC technology was invented by YONEX to maximise the vital sweet spot area and is now a world-leading feature of our racquets. The square-shaped head of the racquet means that there are more strings crossing at right angles, resulting in a bigger sweet spot. YONEX continues to develop and enhance ISOMETRIC power, reducing still further the 'inert' space around the edge of conventional racquets, creating a far bigger sweet spot than other frames.

*ISOMETRIC™ is a trademark of Yonex Co., Ltd.*

*\*Tested by Yonex*

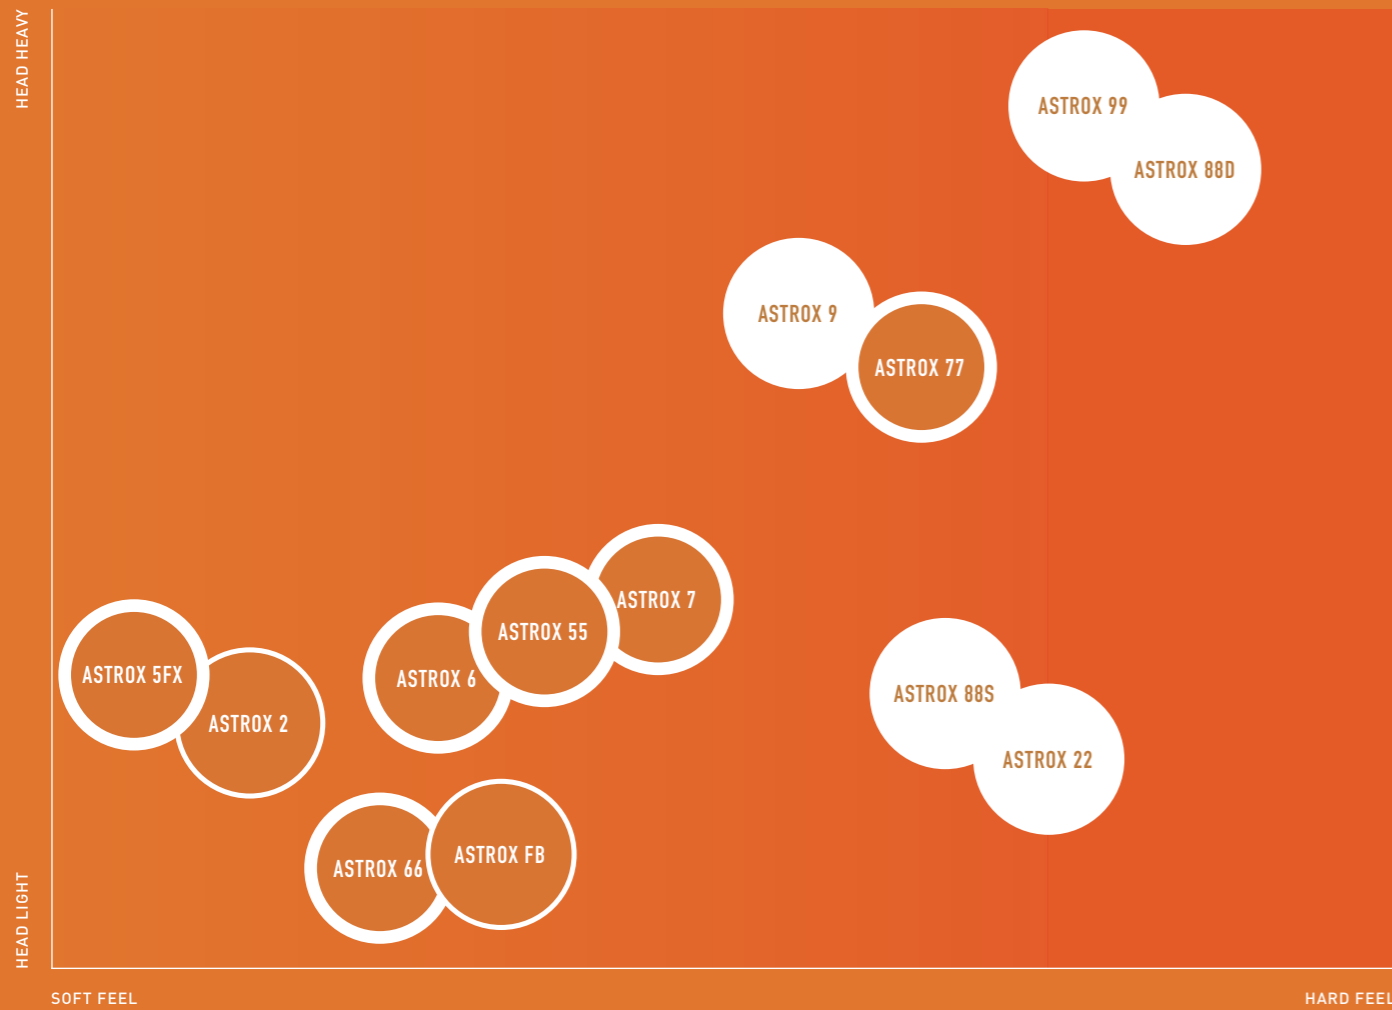

# ASTROX

## STEEP ATTACK

The ASTROX series will help you take the point to your opponent with devastating smashes and steep attacks. Developed for aggressive play, ASTROX racquets are designed to dominate every match.

It starts with the application of counterbalance theory to racquet design. Our Rotational Generator System distributes the weight throughout the grip end, frame top and the joint for maximum control, enabling you to transition between shots smoothly, in rapid succession.

Namd, a graphite that produces more flex and faster snapback, lets ASTROX racquets unleash dramatic power. Innovative design like the new Energy Boost Cap maximize Namd's advantage, giving you more flex on the front of the shaft while helping to stabilize the racquet face on every shot. Seize the moment on court and overpower the competition with ASTROX series racquets.

### ROTATIONAL GENERATOR SYSTEM

By applying the counterbalance theory, weight is distributed throughout the grip end, frame top and the joint for maximum control. The transition to the next shot can be performed smoothly, with rapid succession.

### ENERGY BOOST CAP

New Energy Boost Cap maximizes the shaft's performance. The front allows the shaft to flex and exert the maximum effect of Namd. The side's arch-shaped curve stabilizes the racquet face by preventing the shaft from twisting.

### Namd™

#### NEW REVOLUTIONARY MATERIAL

Utilizing high quality Namd graphite in the shaft produces more flex with a faster snapback, unleashing dramatic steep power.

\*Namd is technology developed by Nitta Co., Ltd. to 'uniformly disperse carbon nanotubes in carbon fiber composites.'

# NANOFLARE

## RAPID FIRE

Lightning-fast speed meets exceptional repulsion in the new NANOFLARE series. Engineered to improve swing speed and maneuverability, NANOFLARE is the first head-light racquet that also allows you to access the point-winning power of increased shuttle acceleration in one design.

The difference is in the technology – using the new SONIC FLARE SYSTEM, NANOFLARE combines TORAYCA® M40X, a brand-new carbon fiber, and Super High Modulus Graphite to take Aero Frame design to the next level. The results are unmatched stability and speed, improved repulsion performance and the precision accuracy to ace every shot. From the ground up, NANOFLARE was created to give you the edge.

### NEW AERO FRAME

Engineered for speed, AERO Frame technology is built to flex on impact and immediately snapback, helping launch the shuttle further and faster.

### SONIC FLARE SYSTEM

The revolutionary new graphite material TORAYCA® M40X and SUPER HMG provide unrivalled power and stability for maximum shuttle acceleration.

# DUORA

## DUAL IMPACT

Dominate the court with the DUORA series, a racquet that gives you the power of two frames in a single, sleek design. The DUAL OPTIMUM SYSTEM brings together two contrasting racquet profiles in one frame, combining their strengths for an all-around blend of power, speed and control.

To achieve unparalleled speed, DUORA racquets are constructed with NANOMETRIC DR, a lightweight graphite that is as stiff as conventional material while weighing 60% less. This results in fast swings, firmer shuttle hold, and enhanced repulsion for explosive shots – everything you need to give you the edge in a close match.

Beginner to intermediate players with basic skills

Intermediate to advanced players with developing skills

### DUORA GROMMET DESIGN

8 linked grommets made with differing thicknesses on either side of the frame. The stiffer AERO side grommets pull the string harder for increased power.

### DUAL OPTIMUM SYSTEM

Two contrasting racquet profiles in one unique Dual Dynamic Design allow players to enhance both their forehand and backhand. Command the court with powerful forehands and speedy backhands.

### NANOMETRIC\*

#### NANOMETRIC DR

NANOMETRIC DR is an enhanced graphite based on unique NANOSCIENCE technology for a firm shuttle hold creating maximum repulsion.

\* NANOMETRIC is a material which applies the NANQALLOY™ technology of Toray Industries, Inc.

# VOLTRIC

## CRUSHING POWER

The VOLTRIC series unleashes explosive power. This head-heavy racquet is designed for applying unstoppable force to your shots, allowing you to deliver unanswerable smashes and point-saving clears.

Dominating power starts with the racquet's TRI-VOLTAGE SYSTEM, a balanced design that makes head weight, shaft flex and frame

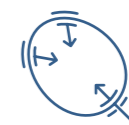

aerodynamics work together as one comprehensive system. The upper frame is built with BLACK MICRO CORE, a stiff, high-density material that dampens vibrations to give you secure, solid feel even when delivering massive hits.

# NANORAY

## LIGHTNING SPEED

Lightweight and fast, NANORAY racquets give you the power to dominate the court with lightning-fast shots. From the sleek, aerodynamic design to its head-light frame, everything in this series is built to give your game unstoppable speed.

And while NANORAY racquets are fast, they also deliver the dominating power you need for serious smashes.

The secret is in the X-FULLERENE graphite construction – it gives the shaft an ultra-stiff flex, generating extreme repulsion to unleash heavy hits. Whether you are just starting out or an experienced player looking for a light racquet that doesn't sacrifice power, NANORAY will give you the speed you need to win.

Beginner to intermediate players with basic skills

Intermediate to advanced players with developing skills

Advanced players with enhanced skills

### NANOSCIENCE

Unique NANOSCIENCE technology allows the sleek streamlined frame and shaft to cut effortlessly through the air for maximum speed.

### X-FULLERENE

Incorporated into the shaft for increased stiffness and repulsion power for deeper shots into the opponent's court during high-speed rallies.

## NANOSCIENCE

NANOSCIENCE technology allows Yonex to alter the structure of materials in a racquet to enhance the **STRENGTH, FLEX and POWER.**

### NANOMESH + CARBON NANOTUBE

For increased strength and power with quick fire handling.

### NANOAIR SPRING

Tiny air pockets within the graphite improve energy transfer to the shuttle.

### NANOMETRIC

Tightly bonded fibers enhance the racquets strength and minimize twisting during impact. NANOMETRIC is a material which applies the NANOALLOY™ technology of Toray Industries, Inc.

### NANOMESH NEO

Ensures a stronger more flexible frame, while increased shaft flex creates maximum power.

## MATERIAL HIGHLIGHTS

### REXIL FIBER

Increases repulsion power to the shuttle while minimizing shock at impact.

### SOUND FILTER

Produces an aggressive powerful sound.

### EX-HMG/SUPER HMG

This ultra-elastic material produces sharper power for all shots.

### LIGHT FEEL CARBON NEO

The additional rubber creates a lighter feel and increased flex for greater head speed.

### NICKEL-TITANIUM FIBER

Increased stiffness and frame shape retention ensures quickfire power.

### SONIC METAL

Situated in the lower frame for aggressive snapback power with an attacking sound.

### TOUGHLEX

Increased racquet flex and shot intensity to increase power from even slow swing speeds for effortless clears.

### VIBSLAYER CARBON

Incorporated into the bottom half of the frame for extra distance on clears in combination with reduced shock impact, fatigue and stress on the body. VIBSLAYER CARBON utilizes materials made by Toray Industries, Inc.

### IC ELASTOMER

This soft Elastomer material increases dwell time for greater power transfer to the shuttle.

### TRANS-WEIGHT SYSTEM

Ensures a headlight frame for quicker acceleration on swings.

## FRAME

### ISOMETRIC

Increases the size of your sweet spot.

### BOX FRAME

The extra stiff profile provides a solid stable feel on impact with the shuttle.

### AERO FRAME

Cuts air resistance for faster swing speeds and increased manoeuvrability.

### AERO+BOX FRAME

A combination of faster swing speeds and a solid feel.

### DELTA POWER FRAME

Stable hits without a loss of power.

### AERO+BOX VARIFRAME

Minimized air resistance transfers more power and speed to swings.

### AERO FIN

Fins positioned at the top of the frame reduce air resistance for improved swing speeds.

### MEGA FRAME

34% bigger sweet spot creates greater reach and more effective off-centre hits.

### SOLID FEEL CORE

Reduces vibrations traveling down the shaft for improved comfort.

### TRI-IBUMPER

Tungsten-infused grommets produce maximized dwell times for increased power.

### COMPACT FRAME

Reduced air resistance and improved feel with the shuttle.

### VERTICAL-A CONCEPT

Vertical grommets provide greater flex in the string bed and a wider sweet spot.

### NEW GROMMET PATTERN

Single pass grommet holes for reduced string stress, maximizing performance.

### MUSCLE POWER FRAME

Smoother grommets reduce string stress for greater durability.

### DX FRAME

Distributes shock and pressure-improving feel. Also allows for higher string tensions.

### HORIZONTAL-A CONCEPT

Larger sweet spot at the top of the frame in a compact head design.

### SBZ (SNAPBACK ZONE)

The slimmer section of racquet frame flexes at impact for greater shuttle speeds.

### SUPER SLIM FRAME

Reduces air resistance for quicker swing speeds with a solid feel.

### DURA FRAME

Provides Aluminium frames with greater strength and a solid feel.

## JOINT

### BUILT-IN T-JOINT

Increases strength between the frame and shaft eliminating head twist for more control.

### NEW BUILT-IN T-JOINT

The lightweight T-Joint increases stability of the shuttle on the strings, maximizing power and control.

### T-ANCHOR

Increases stiffness for quicker racquet recovery into the next shot.

## SHAFT

### SLIM SHAFTS

Designed to slice through the air, generating speedy power.

### ULTRA PEF

Lightweight fibres that withstand immense forces while absorbing unwanted shock and vibrations.

### DUAL WHIP-BACK SHAFT

2 kick points allow for extra flex in the shaft for extended shuttle flight.

## CAP

### CONTROL SUPPORT CAP

Wider, flatter surface improves grip for increased racquet control.

### TFA CAP

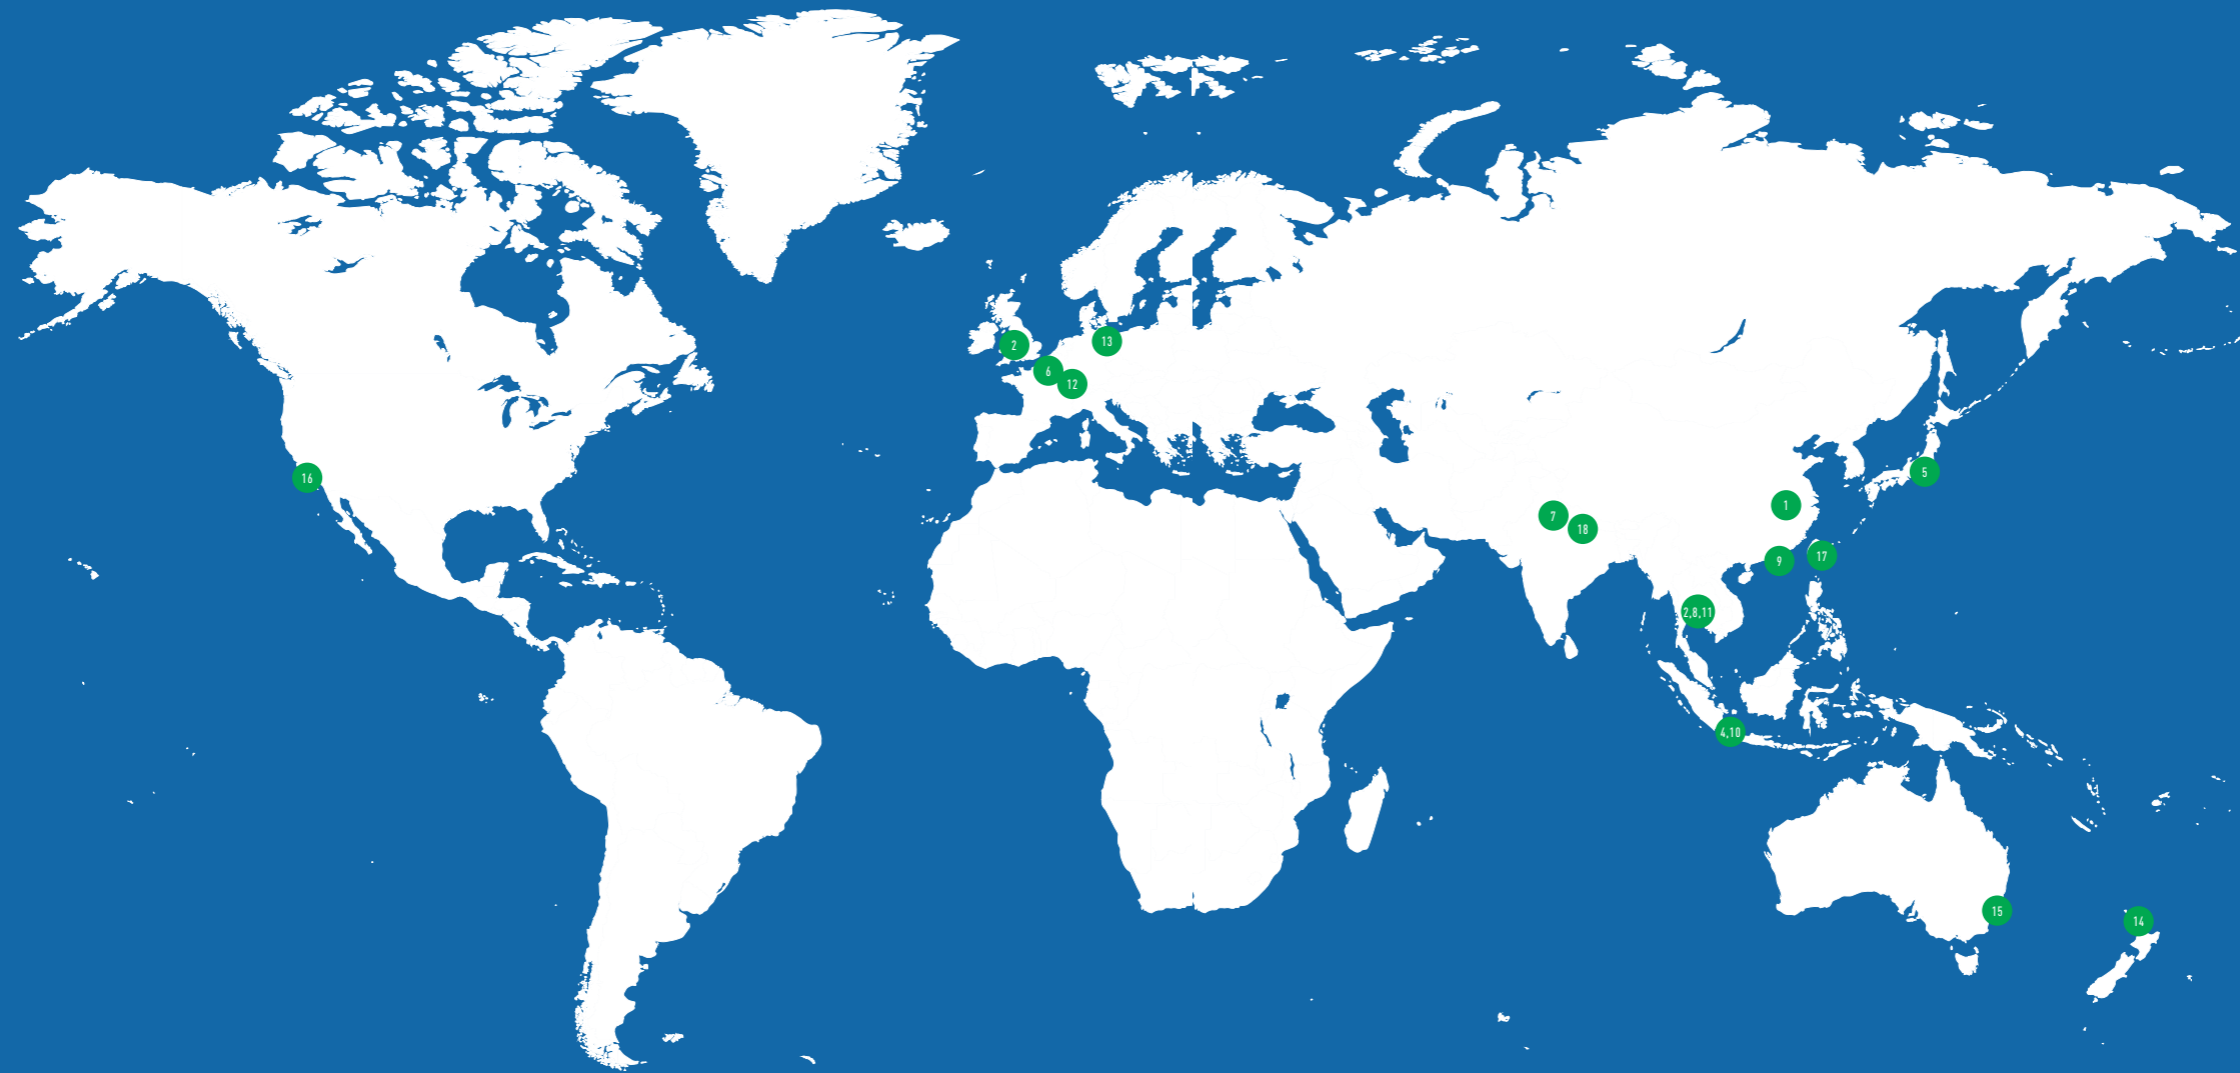

Accelerates frame recovery after impact and dampens unwanted vibrations for a more comfortable fit.

### VIBRATION FILTER CAP

Reduces unwanted vibrations for a clean shot feeling.

### POWER BOOST CAP

A unique mix of stiff and flexible materials generate additional power while maintaining stability.

## ELITE PRECISION

The Yonex Stringing Team is a network of racquet-sport experts. They travel globally, giving professional athletes the precision setups they need to compete at the highest levels of the sport. They bring with them years of experience, knowledge and a passion for the game that is second to none.

With over 1,500 members internationally, they are the only team of their kind in the world and string racquets across three sports— badminton, tennis and soft-tennis. As the official stringer to Badminton World Federation Major Events and other global tournaments from past and present, the Yonex Stringing Team will continue to be a visible part of the global badminton community in the future.

# BADMINTON STRINGS

## CONTROL

The AEROBITE, the first ever hybrid badminton string, has braided threads which create a robust string structure, and its polyurethane coating gives more hold on the shuttle. It is the ideal string for advanced players.

## HARD-HITTING SOUND

The multi-braided structure of the BG85, with threads of varying thicknesses around the core thread, improves performance on hairpins and cut smashes, and generates great repulsion power with a sharp touch.

## HIGH REPULSION

The BG66, with its Multifilament Core, is super-fine for high-durability and a soft feel, and is an all-round string, suitable for all player levels. The BG80, with multifilament core and Vectran™ provides a high-strength and high-elasticity spiral winding to prolong durability and tension and is ideal for the more advanced player.

## DURABILITY

The BG65 Titanium delivers a hard feeling from the Hydro Titanium coating to provide a sharp but comfortable feel. The NANOGY 95, with its CUP-STACK CARBON NANOTUBE advanced construction to reduce notching of the strings, increases speed. These strings are perfect for improving control, especially for hard-hitting players, and increasing durability.

# PERFECT STRINGS

Choosing the right strings is as important as choosing the right racquet – both will give you the advantage you need to dominate your opponents. That is why Yonex puts so much effort into designing innovative new products like AEROBITE BOOST, a hybrid multifilament string engineered for maximum control without sacrificing repulsion. The vertical strings are made of Vectran™, a super fiber more than twice as powerful as nylon. Combined with a super-thin cross string, this hybrid setup retains

more impact energy while giving you access to enhanced repulsion for explosive power.

We design and manufacture our strings at Yonex facilities in Japan where we engineer next-generation polyesters and hybrids and are able to control quality down to the smallest detail. Little things matter, so no matter whether you are looking for just the right feel, the perfect touch, or extreme durability, Yonex makes a string built to improve your performance at every level of play.

# STRINGING MACHINE

## ELECTRIC BADMINTON, TENNIS & SOFT TENNIS STRINGING MACHINE PT8 DELUXE

SIZE (APPROX)	1050mm (W) x 500mm (D) x 1080-1270mm (H)
WEIGHT (APPROX)	56kg / 123lbs
ITEM CODE	PT8DXW

### AERO COVER

ITEM CODE	PT8DXC
-----------	--------

\*Aero Cover sold separately and is not included with the stringing machine.

Made In Japan

Made In Japan

## FEATURES

### PRECISION: COMPUTER UNIT

New and improved touchscreen conductivity.

The system has added an option to set tension in 0.5kg increments while retaining the 0.2kg option from the previous model, allowing for even more precise stringing.

### STORAGE SPACE: STRING RAIL & AERO COVER

A rail placed under the work table creates a practical storage space for rolls of string.

Sold separately from the main machine, an Aero Cover can be applied to the stringing machine, conveniently expanding storage space.

### EFFICIENCY: TENSION HEAD

The drum has been made smaller and positioned closer to the turntable to reduce the amount of string used, improving stringing efficiency.

### WORKABILITY: CLAMP

The PT8 Deluxe features an upgraded clamp, with a thinner and more ergonomic design. The new clamp is shorter than in previous models, offering a great improvement in workability.

## ELECTRONIC TENNIS, BADMINTON & SOFT TENNIS STRINGING MACHINE PRECISION 5.0

SIZE (APPROX)	1165mm (W) x 477mm (D) x 1055-1205mm (H)
ITEM CODE	SPR50W

## FEATURES

### PRECISE: DISC BRAKE SYSTEM

A first for stringing machines, the PRECISION 5.0 turntable features a braking system utilized in cars and aircrafts that enables quick reactions for improved accuracy.

### USER-FRIENDLY: CONTROL PANEL

Optimized for efficiency, the control panel is designed with large buttons for easy accessibility and to improve accuracy. On the side is a USB port for convenient charging.

### EFFICIENT: RACQUET FRAME SUPPORTS

The frame supports are easily adjustable with a one-click sliding functionality and head-size guides.

### ORGANIZED: TOOL TRAYS

Keep your tools organized with two tool trays; one tucks away below the control panel, and the second is located on the side of the machine.

## ELECTRIC BADMINTON, TENNIS & SOFT TENNIS STRINGING MACHINE

SIZE (APPROX)	950mm (W) x 450mm (D) x 1150mm (H)
WEIGHT (APPROX)	74kg / 163lbs
ITEM CODE	ST-7000EX

## FEATURES

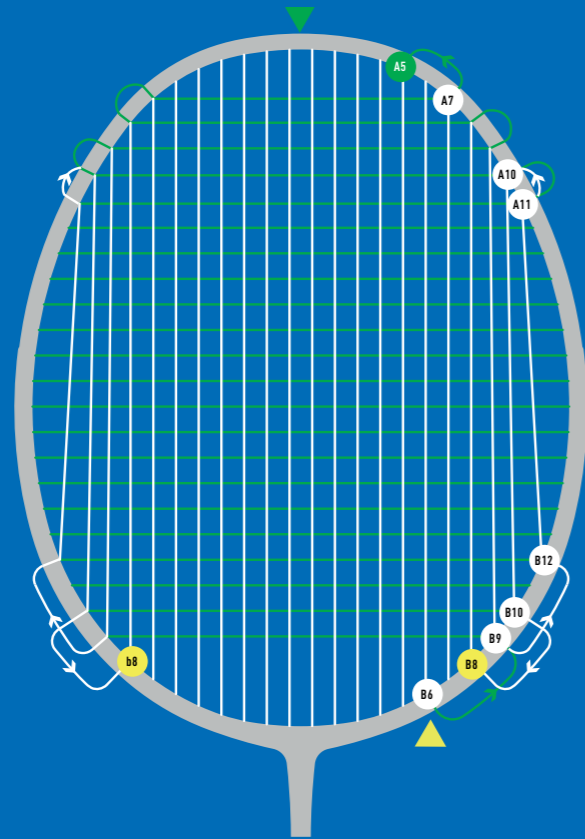

360° swivel turntable for all-round easy access

Precise electronic tension control from 10-90lbs in increments of 0.1lbs

2 convenient ways to use: Standing or Table-Top style

## ABOVE AND BEYOND

Since 1965, Yonex has made the highest-quality Tournament feather shuttlecocks available, known for their consistent, stable flight and for durability that is second to none. They are made at Yonex facilities in Japan, allowing us to ensure quality and deliver a product that performs the same every time.

As the official shuttle of Badminton World Federation Major Events, Yonex shuttlecocks have become the gold standard and are used at tournaments worldwide, including three of the biggest events in the Badminton calendar—the Sudirman Cup, The Thomas and Uber Cup Finals, and The BWF World Championships. Through our continuing partnership with the BWF, Yonex will be the shuttlecock of choice in 2019.

## FEATHER SHUTTLECOCKS

Yonex have been painstakingly hand making the best feather shuttlecocks in the world since 1965. Each of our shuttles is assembled by a team of expert craftsmen using only the finest materials. They are then individually tested to make sure they deliver consistent flight trajectory, accuracy and distance at all temperatures. That's why the best players and the biggest tournaments in the world choose Yonex shuttlecocks.

## NYLON SHUTTLECOCKS

Yonex precision MAVIS Nylon shuttlecocks are the closest you can get to traditional feather. Designed to have the same flight time as a feather shuttle, they give an accurate and durable performance with a traditional feel.

WING RIB™

### WING RIB™

The WING RIB design utilizes air flow through the shuttlecock to restore shape quickly on impact. Based on flight dynamics, this original design grants stable flight, contrary to conventional models that restore shape via stiff construction.

The WING RIB design is featured in MAVIS 2000 and MAVIS 600.

## ***POWER CUSHION***

A lightweight, impact-absorbing material developed independently by Yonex which quickly returns to its original shape after receiving a shock load, converting the shock energy into power for fast and light footwork.

# POWER CUSHION INFINITY

The unmatched comfort of POWER CUSHION+ construction meets the most secure fit of the double-dial Boa® Fit System, making your footwork faster and lighter than ever.

**BOA® FIT SYSTEM**  
The laceless double-dial Boa® Fit System secures to your feet at your toes and your ankle for an unparalleled fit.

**3D POWER GRAPHITE SHEET**  
Increases stability for your footwork without sacrificing comfort.

**POWER CUSHION+**  
Adds up to 28% more shock absorption and 62% more repulsion than conventional cushioning material (EVA).

## POWER CUSHION INFINITY

All-around comfort and stability for the best-fitting performance

ITEM CODE SHBIF

COLOR: BLACK, RED

# STABILITY

Give your footwork the confidence that comes with stability.

## DURABLE SKIN

Lightweight outer skin combines the stiffness of hard plastic with the flexibility of rubber for a comfortable, secure fit.

## TPU SUPPORT

Increased stability on the outside of the shoe, achieved without sacrificing the flexion in the forefoot.

## INNER BOOTIE

A knit bootie is integrated into the shoe replacing the conventional tongue for improved comfort and better all-around fit.

# LIGHTWEIGHT

Our lightest shoe ever. Get to the shuttle quicker in this lightweight-but-durable shoe.

## HEXAGRIP

For agile and stable footwork, the hexagrip pattern provides 3% more grip and is 20% lighter than a standard sole.

## DURABLE SKIN LIGHT

Combination of high quality mesh and thin PU film provides comfortable fit and reduces excess weight.

## SYNTHETIC MESH VENTS

2 x more synthetic mesh area improves ventilation.

COLOR: BLACK, BLUE

# CUSHIONING

**FLEXION UPPER**  
Asymmetrical design with a curved eyelet creates a natural snug fit around the inner arch. Stress gets absorbed through the toes and instep for a more comfortable fit.

**SPIRAL WRAP**  
The tongue of the shoe is connected to the shoe upper. It wraps the foot for a comfortable and snug fit.

**FULL CUSHION SOLE +S**  
Features Power Cushion throughout the entire midsole which distributes pressure in the heel area, resulting in reduced stress on the ankle.

**COLOR:** BLACK (MEN), CHARCOAL GRAY (WOMEN)

**COLOR:** BRIGHT ORANGE (MEN), NAVY / PINK (WOMEN)

# ALL ROUND

**LATERAL SHELL**  
The Lateral Shell located on the outside of the forefoot prevents sliding at the edge of the sole. Reduces power loss, increases footwork response and creates smooth, fluid and offensive foot movements.

**SEAMLESS DESIGN**  
A comfortable seamless design with no stitching, making for a more natural fit.

**3D Power Graphite Sheet**

Provides stability under the center of the foot and reduces shoe twist.

**Power Graphite Lite**

Improved stability and reduced twist on landing.

**Toe Assist Shape**

Reduces pressure on the big toe while improving support at the mid-foot and heel for increased stability. Power loss is reduced for swift footwork.

**UPPER:**

**Tough Guard™ III**

Extremely durable wear-resistant synthetic leather.

**Durable Skin**

Improves shape retention, durability and heat-resistance.

**Double Russel Mesh**

Highly breathable mesh for maximum ventilation.

**Lateral Shell**

Prevents foot movement at the edge of the sole for reduced power loss, allowing for fluid and offensive footwork.

**Ergoshape**

The center of gravity is shifted to the large toe – for a comfortable fit and more speed.

**MIDSOLE:**

**ToughBrid Light**

Provides cushioning, shape retention and high elasticity whilst reducing shoe weight.

**Hyper msLite**

Lightweight midsole that still maintains its shape.

**Power Graphite Lite**

A lightweight graphite plate that increases stability on landing for rapid footwork.

**INSOLE:**

**Synchro-Fit Insole**

Reduces the gap between the foot and shoe with extra support around the heel, for maximum grip, comfort and performance.

**SOLE:**

**Hexagrip**

Lightweight sole material that provides greater grip for agile stable footwork.

**Round Sole**

For quick and smooth footwork ensuring maximum energy transfer into the next shot.

## The Legends' Vision YONEX.

The Legends' Vision initiative brings together superstars from past and present to introduce the sport to new audiences while igniting a passion for badminton that lasts a lifetime. Lee Chong Wei, Lin Dan, Peter Gade, Taufik Hidayat, and Lee Yong Dae headline a World Tour featuring interactive events and entertainment. Fans get to meet pro athletes for Q&A, attend coaching sessions, and see The Legends play exhibition matches.

Increasing interest and participation in the sport, the Legends' Vision leaves a lasting legacy in every country it visits. Since beginning the Legends' Vision tour in 2015, its success has inspired us to expand the initiative, visiting new countries and creating new fans along the way. To learn more, head to [Legends.Yonex.com](http://Legends.Yonex.com) and look out for new events in 2019.

# CLOTHING TECHNOLOGY

## VERYCOOL DRY

KEEP COOL, DRY AND ON TOP OF YOUR GAME

A special hydrophobic fiber moves moisture from the skin to the fabric's surface. Along with its quick drying property, VERYCOOL DRY keeps you cool and dry at all times.

## POWER SLEEVE

SMOOTHER ARM MOVEMENT WHEN IN ACTION

Affording a 165° range of motion in the sleeves, our shirts boast less restriction and free movement.

## VERYCOOL

A COOL WAY TO BEAT THE HEAT

By using quick-drying Xylitol, VERYCOOL clothing from Yonex absorbs heat and perspiration, providing a significant cooling effect during exercise. No matter what the ambient temperature, VERYCOOL lowers body heat by 3°C for cooler play\*.

\*Data from Unitika Garments Technology & Research Laboratories Ltd.

## WATER REPELLENT

RAIN-DEFYING FABRIC

Stay dry longer with WATER REPELLENT fabric designed to keep you comfortable in inclement weather.

## UV REDUCTION

OUTSTANDING ULTRAVIOLET INTERCEPTION

Yonex clothing intercepts infrared radiation and approximately 92%\* of ultraviolet, minimizing heat build-up during play.

\*Tested by BOKEN QUALITY EVALUATION INSTITUTE.

## POLYGIENE (ODOR CONTROL TECHNOLOGY)

STAY FRESH AND ODOR-FREE

Woven into the fabric, this odor control tech keeps you fresh and odor-free even after intense play.

## AIR RELEASE

SUPERIOR COMFORT IN THE HEAT

As warm air rises, cold air enters into open areas. Based on this fact, new Yonex Air Release technology has greatly improved ventilation in our shirts. Mesh in the back of the neck provides high ventilation, pushing out body heat. Meanwhile, fresh air is taken in through mesh equipped on the side of the shirt from the bottom to the armpits, keeping you cool under severe heat.

Air-Release

## ANTISTATIC

AVOID THE DISCOMFORT OF STATIC ELECTRICITY

Carbon impregnated conductive fibers are woven into the clothing to remove static electricity build-up.

## STRETCH

FLEXIBLE, FORGIVING AND FASHIONABLE

Innovative stretch material allows for free movement that supports your active play.

## SWEAT ABSORBENT AND QUICK DRYING

STAY DRY AND LIGHT

Fabric that wicks away moisture and keeps you dry.
